

Data Collection and Preprocessing Phase

Date	12 June 2024
Team ID	SWTID1749709340
Project Title	Predicting Co2 Emission by countries Using Machine Learning
Maximum Marks	2 Marks

Data Collection Plan & Raw Data Sources Identification Template

Elevate your data strategy with the Data Collection plan and the Raw Data Sources report, ensuring meticulous data curation and integrity for informed decision-making in every analysis and decision-making endeavor.

Data Collection Plan Template

Section	Description
Project Overview	This project involves predicting CO ₂ emissions by country using machine learning techniques on a global development dataset. It includes trend analysis, feature encoding, and model-driven estimation of emission values based on country and year.
Data Collection Plan	The dataset was sourced from publicly available global development databases and includes country-level indicators across multiple years. Relevant features such as CO ₂ emissions, country, and year were selected and imported in CSV format for analysis.
